ISO 14001
ISO 45001

Validity of the price list

Loimi-Hämeen Jätehuolto Oy takes care of waste utilisation and processing in its sub-municipalities.

The municipalities are Akaa, Forssa, Eura, Huittinen, Humpplila, Jokioinen, Koski TL, Loimaa, Oripää, Punkalaidun, Sastamala (excluding Suodenniemi and Mouhijärvi), Somero, Säköylä, Tammela, Urjala and Ypäjä.

This price list is valid from 1.1.2026, until the new revised price list comes into effect. However, any changes in prices due to legislation or similar will be reflected in the fees from the date of entry into force.

The current tariff and price list can be found at: www.jatelk.fi and www.lhj.fi

Single sofa / armchair (NOTE! Price € /seat)	10,00 €
Brushwood and garden waste, starting from 2 m³	3,50 €
Brushwood and garden waste, one waste bag (less than 200 l)	0,50 €

GLOSSARY OF FEES AND SERVICES

For the purposes of this price list:

Regional collection point: an unmanned collection point where properties excluded from individual waste collection can deliver their mixed waste as agreed. The right to use the regional collection point is reserved for properties that have paid an annual fee for the use of the regional collection point.

Biowaste: compostable, organic, entirely biodegradable waste.

Recyclable waste: waste that is required by municipal waste management regulations or instructions issued pursuant thereto be collected for recovery (e.g. glass, metal, cardboard and plastic).

Household waste transport: waste transport where waste is collected from a property. In property-specific waste transport, the waste bin can be the property's own waste bin or a waste bin in shared use, and it must be located in a place defined in waste management regulations.

Waste transport organised by the property holder: a transport system where the holder of the property arranges the transport with a professional waste transporter.

Supplementary mixed waste collection: waste management organised by the municipality for properties that have failed to fulfil their obligation to arrange waste transport with a registered waste carrier.

Secondary responsibility of municipalities: waste law under Article 33 of the Municipal Act, where the holder of the waste requests it due to the lack of other reasonably available services and the waste is of a quality and quantity suitable for the municipal waste management system.

Packaging waste: recyclable waste in the form of packaging, such as plastic, cardboard, glass or metal packaging.

Freight service: If the waste container is replaced more than every three years or if the waste container previously supplied by LHJ is no longer on the property, the customer may be charged the price of the waste container and the freight service fee for replacing the waste container and delivering it to the property.

Mixed waste: the municipal waste that remains after sorting out the recyclable waste and other materials not included in mixed waste.

Ventilated bio-waste bin: a bio-waste bin that is equipped in such a way that the bio-waste can dry in the bin.

Municipal waste: waste from residential sources and waste of similar nature and quantity from industrial, service or other activities; excluding hazardous waste, dry toilet waste, sewage, sewage sludge, soil and stone or similar waste.

GLOSSARY OF FEES AND SERVICES

Basic fee for waste management

The basic fee for waste management covers the services provided to households, which are the responsibility of the municipality under the Waste Act. These include the collection and treatment of household recyclable waste and hazardous waste, waste advice, the operation of waste committee and waste management development work. The costs of the control register set up under Article 143 of the Waste Act and the preparatory

work for keeping a register of sewage sludge and septic tank sludge are also covered by the basic fee. In accordance with Article 79 of the Waste Act, the basic fee is based on the use of the property. In the case of holiday homes, the fee is lower because they are assumed to be used only part of the year. The basic fee is not dependent on the amount of waste generated or the number of inhabitants in the property.

Waste bin service

The waste company is obliged to provide the waste bins of 140-660 l to the property owner free of charge when the customer joins separate collection. The same applies in cases where the waste bin size is not appropriate for the household, additional waste bins are needed, the waste bin is broken or otherwise does not meet the requirements of the waste management regulations. The bin is delivered to the property and the waste holder places the bin at

the location of their choice, taking into account the requirements of the waste management regulations. If the waste bin is replaced more than every three years or if the waste bin previously supplied by the waste company can no longer be found on the property, the customer may be charged the price of the waste bin and a freight charge for the replacement/transport of the waste bin to the property.

Supplementary collection of mixed waste organised by the municipality

The waste fee for a property subject to a supplementary mixed waste collection organised by the municipality is determined by the use of the property and the frequency of emptying the property's waste bin at the time of billing. The waste fee is charged to the owner or holder of the property. The waste fee covers costs such as the waste bin, the emptying of the waste bin, waste reception, treatment, transport and administration. If a property is sold or taken into use in the

middle of the year, the annual fee is charged according to the months of use. The same applies if the customer changes from a supplementary collection of mixed waste to a private service provider. The waste management authority decides on the emptying intervals at which the waste is to be emptied in derogation of the waste management regulations. An application for a special interval must be sent to the following address: **www.jateltk.fi**

GLOSSARY OF FEES AND SERVICES

Separate collection of biowaste organised by the municipality

Waste collection fees are determined by the type of bio-waste collection equipment in the property, the location of the waste bin and the number of times it is collected. The waste fee includes the transport and treatment of bio-waste and the mechanical washing of the manually movable (wheeled) bin twice a year. The fee is charged even if some or all of the bio-waste bins are empty at the time of collection.

Longest possible emptying intervals for biowaste bins in accordance with waste management regulations:

Bin	Summer time intervals (weeks 18-40)	Winter time intervals (weeks 41-17)
Biowaste bin, 140 l - 660 l	2 weeks	4 weeks
Biowaste bin, ventilated 140 l and 240 l	4 weeks	4 weeks
Crane-liftable containers	4 weeks	4 weeks

In urban areas, it is also possible to empty bio-waste bins once a week throughout the year. If possible in urban areas, the emptying interval can also be every 3 weeks.

No waste fee will be charged if the collection container has not been emptied due to negligence by Loimi-Hämeen Jätehuolto Oy or the contractor. The property holder must report the negligence to Loimi-Hämeen Jätehuolto

Oy. It is not considered negligence if the collection container is too heavy, broken, frozen, or too tightly packed.

The cancellation of collection must be given two weeks in advance. If the bio-waste bin contains a substantial amount of non-compostable waste, the waste collection fee will be increased by 100%.

GLOSSARY OF FEES AND SERVICES

Separate collection of packaging waste organised by the municipality

Waste collection fees are based on the type of collection equipment, the location of the bin and the number of times the bin is collected from the property for packaging waste (glass, metal, cardboard/plastic and plastic).

The waste fee includes the transport of the packaging waste. The fee is charged even if some or all of the packaging bins are empty at the time of collection.

Longest possible emptying intervals for packaging waste bins in accordance with waste management regulations:

Type of waste	Bin	Summer time intervals (weeks 18-40)	Winter time intervals (weeks 41-17)
Cardboard packaging	140 l to 660 l wheeled and crane-liftable containers	16 weeks	16 weeks
Plastic packaging	140 l to 660 l wheeled and crane-liftable containers	16 weeks	16 weeks
Glass packaging	140 l to 660 l wheeled and crane-liftable containers	24 weeks	24 weeks
Metal packaging and small metal	140 l to 660 l wheeled bins and crane liftable containers.	24 weeks	24 weeks

For cardboard and plastic packaging, it is also possible to have the bins emptied once a week throughout the year in the urban area. Where possible, the frequency of emptying can also be every 3 weeks in the urban area. For glass and metal packaging, the intervals are 4, 8, 12, 16 or 24 weeks.

No waste fee will be charged if the collection container has not been emptied due to negligence by Loimi-Hämeen Jätehuolto Oy or the contractor. It is not considered negligence if the collection con-

tainer is too heavy, broken, or if the access route to the property has been unusable. The property owner must notify Loimi-Hämeen Jätehuolto Oy of any negligence. Notification must be given if collection is discontinued.

The cancellation of collection must be given two weeks in advance. If the packaging waste container contains a significant amount of waste other than the types of waste according to the instructions, the waste collection fee will be increased by 100%.

GLOSSARY OF FEES AND SERVICES

Pick-up service

The pick-up service picks up waste and items that cannot be placed in a regular waste bin due to their large size or other characteristics. See a more detailed listing on our website. The price of the pick-up service consists of labour costs, transport fee and possible waste handling fee.

Pick-up will be arranged within two weeks of the order on weekdays between 8 am and 2 pm. The service can be ordered either from: **www.lhj.fi/sahkoinenasiointi** (only in finnish) or by calling **(03) 424 2622** (weekdays from 9 am to 3 pm).

DETERMINATION OF WASTE FEES

Waste fees are complied with:

- Properties/waste holders whose waste management services are organised by LHJ on behalf of the municipality.
- In the case of waste transport organised by the holder of the property, when waste is delivered for treatment at a reception point designated by the LHJ.

WASTE SEARCH - HELP FOR EVERYDAY ENVIRONMENTAL ACTIONS

Do you know how to recycle fluorescent tubes or electronic waste? It's no longer a question of knowing how to sort them properly, as the right answer can be found quickly on the Waste Search. Waste search is an easy-to-use sorting assistant developed by Loimi-Hämeen Jätehuolto, where you can find recycling instructions and collection points for up to a thousand different items and things. Sorting instructions can also be shared with others, even on your smartphone.

The site is web browser-based and works on all devices with a working internet connection. Waste search also has a handy map service that shows the nearest recycling points, whether you are in Forssa or Säkylä.

Service is available only in Finnish.

Check out the waste search at:

www.lhj.fi/jatehaku

If you cannot find sorting instructions for the waste you are looking for in the Waste search, you can contact our experts by sending an email to asiakaspalvelu@lhj.fi.

You can also suggest new waste and recycling instructions for which you would like to find in the waste search.
